

Dear LSA (Attention Megan Ryan),

This is in response to the Paseos at Foothill Ranch Village

The following are responses to your questions:

- 1) 11 Journey Aliso Viejo, Ca. 92656 (48 Deputies)
- 2) OCSD's goals for Priority 1 calls are less than your research shows. The response times for Priority 3 calls are consistent with our goals.
- 3) The sub-station located in Aliso Viejo, is operating at capacity. The Orange County Sheriff's Department (OCSD) is looking to have another sub-station located somewhere in Mission Viejo, Lake Forest, and or Unincorporated areas of south Orange County.
- 4) It should not have any increase for calls for services that would affect response times or affect fire, police, and medical services. If there is any increase for calls for service, the way OCSD prioritizes calls for services for all communities within its operational area, response times should be the same.
- 5) Yes, OCSD/LFPS should be able to absorb this project will little or no effect on police services personnel and or response times.

- 6) The City of Lake Forest is planning on building a new City Hall, which will include an area for OCSD/LFPS. With the development of other housing projects slated for the future expansion, LFPS is looking at adding additional personnel to handle the calls for service and maintain safe service levels and response times for the community.
- 7) I would like to see the plans to see how many entrances there are to the community.
